Environmental Sustainability Environmental Policy Creation

Environmental Policy Creation

As concern grows for maintaining and improving the quality of the environment, organisations of all sizes are turning their attention to the potential environmental impact of their activities, products or services. The investment community is also taking a strong interest, prompting companies to take action to reduce their carbon footprint and implement an Environmental Management System (EMS).

Each organisation's application of an Environmental Management System will vary. However, if an EMS is to be effective it must incorporate an environmental policy which clearly states the environmental aims and principles of the organisation. These are documented in an Environmental Policy Statement (EPS) which operates as the primary statement of environmental responsibility.

There are guidelines in place around the preparation of an EPS including legislative compliance. It is therefore important that organisations receive professional advice in creating a statement that is not only compliant but aligned to a framework of implementation, communication and continual improvement. UXC Connect will support you in your commitment to reducing your impact on the environment by developing an environmental policy that will be used as a guide to steer your company towards sustainability.

THE BUSINESS CHALLENGE

The focus areas detailed in the Environmental Policy Statement (EPS) need to support the sustainability of your business: commercially, socially and environmentally. UXC Connect can help you to address the balance between these areas.

Decisions also need to be made on how to develop, document, communicate and launch the policy to ensure it operates as the company's guiding principle with respect to the environment.

The policy also needs to be consistent with other corporate policies affecting your business, reflect relevant legislation and standards, and address environmental impacts associated with your business activities, products or services.

UXC CONNECT APPROACH

UXC Connect can help ensure that your EPS is developed in accordance with legislation, created in line with sustainable objectives and targets and effectively implemented.

As the environmental policy forms the basis for all parts of the organisation to develop their own objectives and targets, it is usually developed in consultation with stakeholders, employee/management representatives and the environmental, health and safety committee. It is therefore important that we meet with all these parties to establish organisational targets and objectives. We will review everyday business processes, internal works programs, strategies and reporting processes and identify areas where environmentally responsible practise can be implemented.

In addition, we will review applicable state and federal legislative frameworks and other policy inclusion requirements, identify the high level objectives and targets for the EMS and create an Environmental Policy Statement that confirms the organisation's commitment to environmental management.

BUSINESS BENEFITS

With UXC Connect's Environmental Policy Statement Creation service, your organisation will be able to:

- Establish your commitment to environmental sustainability and carbon footprint reduction in the form of an Environmental Policy Statement.
- Set measurable objectives and targets for reducing your operational impact on the environment.
- Start the journey towards creation and adoption of an Environmental Management System.
- Understand how to communicate and launch the policy.

ABOUT UXC CONNECT

Our mission is to help our customers create business sustainability through "connecting IT with business outcomes". UXC Connect is part of the UXC group of companies, an ASX300-listed company and the largest Australian-owned IT services company.

WE WANT TO TALK BUSINESS

We want to learn what business outcomes you need from your IT initiatives. We'll listen first, think next, then create a solution tailored to your requirements. To tell us about the business outcomes you need to achieve, please email reply@uxcconnect.com.au
